Water heater Inline Water Filters

2023

Hansen storage water heater tanks are made from aluminium. Aluminium is not resistant to corrosion. There are a number of different types of corrosion that can occur in aluminium hot water systems.

To increase the life of your water heater we recommend that you install the following inline filters on your filling hose into your main tank. The tank should be flushed and drained before using filters.

Economical option with higher flow rate

5 Micron sediment inline cartridge filter

Activated Carbon inline cartridge filter

Premium option with lower flow rate with increased filtration, this water would be suitable for drinking water

Activated Carbon inline cartridge filter
Drinking water faucets available.

These filters re available from Hansen Water Heaters please contact Alister
